PROFESSIONAL SUMMARY

Full-stack software engineer with 8 years building scalable e-commerce, SaaS, and enterprise-grade systems. Expert in React/TypeScript frontends, Node.js/Python backends, and SOLID architectural principles. Proven track record shipping production systems: architected full-stack ADU dashboard with real-time persistence, refactored legacy WordPress plugin into enterprise PHP library using design patterns, built VS Code extension with 6-layer validation system. Staff-level technical leader with demonstrated expertise in system architecture, enterprise design patterns, performance optimization, and cross-functional collaboration.

TECHNICAL SKILLS

Languages & Frameworks: React.js, TypeScript, Next.js, JavaScript (ES6+), Ruby, PHP 8.2+ (OOP), Python, HTML5, CSS3, jQuery, AngularJS, Node.js

Object-Oriented Design & Architecture: SOLID Principles, Class-based architecture, Inheritance, Polymorphism, Design Patterns (Strategy, Factory, Registry, Observer), MVC/MVVM, Interface implementation

Advanced Architecture: PSR-4 Namespaces, Service Layer Patterns, Repository Pattern, Dependency Injection, Enterprise Design Patterns, Decoupled Components, Contract-Based Development

E-commerce & CMS: WordPress, WooCommerce, Shopify (Liquid, Ruby Scripts), Magento, Optimizely

DevOps & Infrastructure: Docker, Docker Compose, Jenkins, Bitbucket Pipelines, GitHub Actions, AWS (Lambda, API Gateway, DynamoDB, SNS, SQS), Railway, Vercel, Git

Extensions & Tools: VS Code Extension Development, Storybook, Cypress, RESTful APIs, A/B Testing, Bootstrap, MySQL, Containerization, CI/CD Automation

Testing & Validation: Cypress (E2E Testing), PHPUnit, pytest, Unit Testing, Integration Testing, 6-Layer Semantic Validation, Test Automation, 100%+ test coverage

Specializations: Full-Stack Development, SOLID Architecture, Enterprise Design Patterns, Object-Oriented Architecture, UX Development, Component-Driven Development, Web Performance Optimization, E-commerce Solutions, Responsive Design, Microservices Architecture, VS Code Extension Development, PHP Enterprise Patterns

PROFESSIONAL EXPERIENCE

Software Engineer 2

Ultra Mobile (Mint Mobile) | May 2022 – January 2026 (3+ years)

- Develop and maintain dual-platform e-commerce systems: WordPress/WooCommerce for ultramobile.com and Next.js/React for mintmobile.com, serving millions of mobile customers
- Built promotions manager plugin enabling marketing team to deploy campaigns faster without engineering dependencies, accelerating time-to-market for seasonal offers
- Created cart integration enabling app users to checkout and add family lines through Ultra Mobile's account management system, bridging native app and web experiences
- Ensure design consistency and feature parity across both platforms despite different tech stacks, coordinating component libraries and API integrations
- Containerized applications using Docker and Docker Compose for consistent development and deployment environments
- Automated CI/CD pipelines using Jenkins and Bitbucket Pipelines, reducing release cycles from days to hours

- Implemented comprehensive E2E testing with Cypress, ensuring application reliability and catching bugs before production
- Contributed to technical infrastructure during 100%+ year-over-year revenue growth following promotion to SE2
- Supported high-profile celebrity marketing campaigns by part-owner Ryan Reynolds, scaling platforms to handle viral traffic spikes

UX Developer

Ultra Mobile (Mint Mobile) | January 2020 – May 2022 (2+ years)

- Led WordPress/WooCommerce front-end development initiatives, creating custom themes and plugins for mobile telecommunications e-commerce platform
- Implemented WooCommerce customizations for prepaid wireless products with multi-month plan options, promotional discounts, and complex product attributes
- Conducted user research and usability testing to inform WordPress theme design and e-commerce flow optimizations
- Collaborated with UX designers and product managers to translate Figma mockups into functional WordPress templates
- Optimized website performance and accessibility, ensuring WCAG compliance and cross-browser compatibility
- Implemented A/B tests on Optimizely platform for CRO team, enabling data-driven conversion funnel optimization
- Championed atomic design methodology by building comprehensive Storybook component library
- Led sprint planning and execution for e-commerce team, managing tickets, QA, and code reviews
- Mentored new team members on frontend systems, code patterns, and architectural best practices
- Eliminated technical debt by refactoring legacy code to modern patterns using ES6+, Webpack bundling, and SCSS

Lead Front-end Developer

Mobovida, LLC (E-commerce) | January 2018 – January 2019 (1 year) Irvine, CA

- Designed and modified Shopify theme with content management features for marketing team independence
- Developed custom Shopify Scripts using Ruby implementing dynamic pricing algorithms, tiered discounts, and customer segmentation logic
- Built Ruby-based cart manipulation and conditional shipping rules for promotional campaigns in Shopify Plus environment
- Deployed frontend optimization including lazy loading, critical path CSS, JS minification measured with PageSpeed and GTMetrix
- Converted content pages to Google AMP for fast mobile loading and improved SEO rankings
- Built custom Shopify functionality using JavaScript, Liquid templating, and Ruby scripting
- Setup serverless backend with AWS API Gateway, Lambda, DynamoDB using Node.js
- Optimized sales conversion through A/B testing using Dynamic Yield and Google Optimize

Lead Web Developer

OneClickSolar.com (Home Solar Installation) | August 2017 – January 2018 Irvine, CA

- Built object-oriented PHP backend using Yii2 MVC Framework for solar installation management
- Integrated Google Maps functionality for internal client tools using service-oriented architecture
- Developed RESTful backend API with class-based controllers for Angular-based internal tools
- Managed software development team members on-site and remotely

Intermediate Programmer

Rebar Interactive (Media Management Agency) | December 2016 – July 2017 Fullerton, CA

- Developed Drupal modules and custom templates for company's online properties
- Created front-end JavaScript widgets displaying dynamic ads driven by data analysis
- Built user-facing tools integrating RESTful APIs with AngularJS framework

Web Developer

360 Business Consulting (Marketing Agency) | July 2016 – September 2016 Orange, CA

- Created and enhanced functionality for clients delivering content, marketing materials, and statistics
- Utilized PHP, JavaScript/HTML/CSS, MySQL, WordPress and Drupal for client solutions

System Administrator

e4Hats.com (E-commerce) | November 2013 – July 2016 Fullerton, CA

- Headed IT department managing hardware, software, and networking for warehouse and office operations
- Introduced new functionality to warehouse software built in CakePHP using object-oriented MVC architecture

IT Administrator

PRB Logics (Electronic Components Distributor) | February 2008 – October 2013 Orange, CA

- Created company website in HTML, CSS, PHP, MySQL managing extensive product database
 - Used SEO and Google Analytics to generate and track increasing web leads
 - Developed internal CRM software in PHP with MySQL for customer data management
-

KEY PROJECTS

Shopify Headless E-commerce Platform

Next.js 14, TypeScript, Shopify Storefront API, Cypress, CSS Modules, Vercel

GitHub: github.com/odanree/shopify-ecommerce | Live: shopify-headless-lemon.vercel.app/

- Architected production-ready headless e-commerce platform with Next.js 14, TypeScript, and Shopify Storefront API integration
- Achieved perfect 100/100 Lighthouse scores across all categories with exceptional Core Web Vitals: 0ms TBT, 0.017 CLS, 0.4s LCP
- Built complete product catalog, dynamic shopping cart, and family plan builder with multi-line pricing calculator
- Established comprehensive E2E testing with Cypress covering cart, products, and checkout flows with GitHub Actions CI/CD

AI Chatbot with Dual Behavioral Strategies

Node.js, TypeScript, OpenAI GPT-4, Shopify Admin API, Docker, GitHub Actions, Vercel

GitHub: github.com/odanree/ai-chatbot | Live: danhle.net

- Built production-ready AI chatbot integrating OpenAI GPT-4 with Strategy Pattern architecture
- Designed extensible architecture enabling dual personalities: Portfolio Strategy and Ecommerce Strategy
- Implemented comprehensive testing suite with 216 unit/integration/E2E tests
- Deployed with Docker containerization, zero-downtime deployments, and embedded widget

ADU Construction Progress Dashboard

React 18, TypeScript, Python Backend, Vite, Tailwind CSS, Railway, Vercel

GitHub: github.com/odanree/adu-dashboard | Live: adu-dashboard.vercel.app

- Architected full-stack real-time budget tracking dashboard with React frontend and Python backend
- Built multi-phase expense management with dynamic budgets, configurable line items, and auto-calculated totals
- Implemented email-based whitelist authentication with role-based access control (whitelisted vs. public views)
- Created Data Manager admin panel enabling users to edit phases, costs, and line items with backend persistence
- Deployed multi-environment setup: Vercel frontend (auto-deploy from master), Railway backend (Docker, health checks)

- Responsive design optimized for mobile and desktop with Tailwind CSS animations and progress visualization

WordPress Plugin: ODR Image Optimizer

PHP 8.2+, WordPress, PSR-4 Architecture, SOLID Principles, Design Patterns, GitHub Actions

GitHub: github.com/odanree/odr-image-optimizer

- Refactored legacy WordPress plugin into enterprise-grade PHP library using PSR-4 namespaces and SOLID principles
- Architected decoupled components with Strategy Pattern (ImageProcessors), Factory Pattern (OptimizationEngineFactory), Registry Pattern (ProcessorRegistry)
- Implemented 100% unit-testable architecture: pure domain logic decoupled from WordPress dependencies via Repository adapter layer
- Built multi-format image optimization pipeline: JPEG, PNG, WebP, with configurable compression strategies and quality preservation
- Established professional CI/CD with GitHub Actions: PHPStan (level:max), PHP-CS-Fixer, PHPUnit test suite, automated releases
- Zero WordPress coupling in core logic—plugin acts as integration layer, enabling reuse in non-WordPress contexts

LLM Local Assistant - VS Code Extension

TypeScript, VS Code Extension API, Local LLM (Ollama/LM Studio), edge-tts, 6-Layer Validation Architecture

GitHub: github.com/odanree/llm-local-assistant | VS Marketplace: published

- Architected robust LLM analysis system with Planning (task decomposition) and Execution (step-by-step processing) modules
- Built 6-layer validation system for code generation: syntax → types → imports → cross-file contracts → hook usage → store contracts
- Implemented AI Narration feature: /explain command generates code explanations and synthesizes to MP3 audio with playable widget
- Designed pattern detection engine recognizing 8 design patterns (CRUD, Auth, Forms, DataFetching, StateManagement, Notifications, SearchFilter, Pagination)
- Built semantic code analysis: /refactor performs 5-layer deep analysis (state management, dependencies, coupling, anti-patterns, data flow)
- Integrated markdown rendering with type-safe angle bracket escaping, headers, code blocks, lists, blockquotes for beautifully formatted explanations
- 100% local & private: all processing on device, no cloud APIs, no telemetry; supports Ollama, LM Studio, vLLM backends
- Production-ready: 521 tests passing, TypeScript strict mode, 0 compilation errors, 0 linting warnings

EDUCATION

LearningFuze, Accelerated Web Development Program | Irvine, CA

DeVry University, Computer Information Systems | Long Beach, CA

Relevant Coursework: COBOL, C++, BASIC, Statistics

KEY ACHIEVEMENTS

- Part of team during Mint Mobile's acquisition by T-Mobile (2023)
- Supported Ryan Reynolds celebrity marketing campaigns with scalable infrastructure
- Built e-commerce platforms serving millions of customers
- Optimized conversion rates through A/B testing and experimentation
- Led development teams across multiple companies and projects

- 8+ years applying SOLID principles and enterprise design patterns across PHP, JavaScript/TypeScript, Python, and serverless architectures
- Refactored legacy WordPress plugin into enterprise-grade PHP library using 6+ design patterns
- Architected 6-layer validation system for semantic code analysis (VS Code extension with 521 passing tests)
- Built full-stack systems with real-time backend persistence and responsive frontends
- Published production-ready VS Code extension (100% private, 0 telemetry, marketplace-ready)
